

# URI ESKENASY

## FULL STACK WEB DEVELOPER

### RELEVANT PROJECTS

#### Hobbit

<https://hobbit-xi.vercel.app/>

- Created an online platform to allow people to meet and chat with each other according to their shared hobbies.
- Users have the option to specify their hobbies and see on the main page only people who share the same hobbies. Users can also chat with people that appear on the main page.
- Technologies used: Node.js, express.js, React.js, Javascript, HTML5, Sass, socket.IO, and firebase.

#### Lazy-Devs

<https://lazydevs.onrender.com/>

- Created an authentication tool for developers. This tool will generate a MERN application boilerplate that can be easily integrated into any MERN application.
- When downloading the folder, the application is ready to use. Users can register, log in, and log out.
- Main technologies used: Javascript, React, nodeJS, ExpressJS

#### Recipe Application

<https://delicious-food-czd2000ex-urieskenasy.vercel.app/>

- Created an online web app with the option to get almost any recipe. The user has the option of searching for a specific dish or choosing from different cuisines. For vegan users, there is also the option to search for only vegan dishes.
- To get the data I used third-party API.
- Technologies used: HTML5, Javascript, react.js, Styled components.
